

Product Specification Sheet:

Compact Pure

Height Adjustable Bath with Powered Seat

able
Healthcare

Highlights:

- **Height adjustable** to minimise carer handling strain
- Integrated **powered seat system** for safe transfer

The **Compact Pure** height adjustable bath is an ideal choice for a Care Home environment. The Pure has been added to the Compact Range to give a cost-effective yet reliable option for care homes.

However, the Compact Pure does not sacrifice the key strengths of the Compact bath range, with its unique shape and height adjustable design giving **maximum comfort to the bather and minimising strain for the carer**.

The Astor Compact Pure has been built to the highest standard, designed for longevity.

The **integrated powered seat** (non-detachable), with its clip and lock lap strap and nursing arms plus obstacle detection, enables bathers to transfer safely and comfortably. The seat is shaped to give optimal carer access.

The **unique internal bath shape** gives the bather a spacious but supported bathing experience. The smooth lines also allow for easier cleaning and superior hygiene control.

The Compact Pure is Cat 5 compliant with WRAS approved components and WRAS approved gantry. The tap and shower are fitted with separate TMV3 temperature control.

Standard Features:

- MWL 125 kg / 20 st
